Expression to Tender - AKA Tyre Testing Contractor

The Australian Karting Association Inc (AKA) is seeking tender applications for the services of a person capable of testing wet weather tyres for the AKA as part of the tyre tendering process 2007

The tyre testing will be conducted on various brands and compound tyres as submitted by manufacturers. The results from the tyre testing will then be used to help determine the successful tender for classes as listed in the Wet Weather Tyre Tender document.

The tester together with his / her staff must be able to satisfy the AKA that the information collected, the tyre compounds tested, and the time at which testing will take place will remain confidential, together with all records gathered during the testing program.

Details of the testing program and requirements are available from the National Office at the above address in the first instance.

Tender applications must be received at the National Office by the close of business (1700 hrs) on the 17th August, 2007.
