

## 2016 COMPETITION TYRES AND VORTEX DVS ENGINES PRIVATE PRACTICE PRIOR TO 1 JANUARY 2016

---

New Competition tyres have been allocated to many Classes for 2016. The Vortex DVS Senior and DVS Junior engines have also been Approved for use in Competition in KA1, Open Performance, KA2 and Junior Performance Classes from the commencement of 2016.

KA understands that many Competitors may want to practice with the new tyres and or the new engines as soon as they are available to them.

KA's insurers have confirmed the following:

*"that competitors will have continuous (insurance) cover for the new engines and competition tyres including practice and testing prior to January 1<sup>st</sup>."*

Accordingly it is confirmed herein that KA licensed drivers who wish to use either the new tyres for their Class or the new Vortex DVS Senior or Junior engines in **PRIVATE PRACTICE ONLY** prior to 1 January 2016, will have continuity of insurance cover provided that:

1. The engines and tyres are applicable to the approved Classes; and
2. All other KA Rules are complied with at all times.

On the basis of these conditions being complied with, such activity is permitted as of this date.
